APLIKASI CATATAN HARIAN

The screenshot displays the Android Studio IDE interface for an application named 'APLIKASI CATATAN HARIAN'. The top toolbar shows various drawing tools, including a selection tool, a line tool, a curve tool, a text tool, a rectangle tool, an oval tool, a wavy line tool, and a zoom tool. The canvas area is divided into two panels: a left panel showing a white background with a blue text input field labeled 'Nama File:' and a right panel showing a blue background with a white text input field labeled 'Nama File:'. The right-hand panel contains the 'Attributes' tab, which lists the following attributes:

- Ab namaFile** (EditText)
- id** (namaFile)
- Declared Attributes** (+ -)
- Layout**
- Common Attributes**
- All Attributes**

4. Pada kelas Java **LoginActivity.java**, tambahkan kode berikut ini :

```
package kominfo.go.id.storage.proyek2;

import android.content.Intent;
import android.support.v7.app.AppCompatActivity;
import android.os.Bundle;
import android.view.View;
import android.widget.Button;
import android.widget.EditText;
import android.widget.Toast;

import java.io.BufferedReader;
import java.io.File;
import java.io.FileOutputStream;
import java.io.FileReader;
import java.io.IOException;

public class LoginActivity extends AppCompatActivity {
    public static final String FILENAME = "login";

    EditText editUsername, editPassword;
    Button btnLogin, btnRegister;

    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_login);
        editUsername = findViewById(R.id.editUsername);
        editPassword = findViewById(R.id.editPassword);
        btnLogin = findViewById(R.id.action_login);
        btnRegister = findViewById(R.id.action_register);
    }
}
```

APLIKASI VALIDASI LOGIN - Membuat Halaman Login

```
        btnLogin.setOnClickListener(new View.OnClickListener() {  
            @Override  
            public void onClick(View v) {  
                login();  
            }  
        });  
  
        btnRegister.setOnClickListener(new View.OnClickListener() {  
            @Override  
            public void onClick(View v) {  
                Intent intent = new Intent(LoginActivity.this,  
RegisterActivity.class);  
                startActivity(intent);  
            }  
        });  
    }  
  
    void simpanFileLogin() {  
        String isiFile = editUsername.getText().toString() + ";" +  
editPassword.getText().toString();  
        File file = new File(getFilesDir(), FILENAME);  
  
        FileOutputStream outputStream = null;  
        try {  
            file.createNewFile();  
            outputStream = new FileOutputStream(file, false);  
            outputStream.write(isiFile.getBytes());  
            outputStream.flush();  
            outputStream.close();  
        } catch (Exception e) {  
            e.printStackTrace();  
        }  
        Toast.makeText(this, "Login Berhasil",  
Toast.LENGTH_SHORT).show();  
        onBackPressed();  
    }  
}
```

APLIKASI VALIDASI LOGIN - Membuat Halaman Login

```
void login() {  
    File sdcard = getFilesDir();  
    File file = new File(sdcard,  
editUsername.getText().toString());  
    if (file.exists()) {  
        StringBuilder text = new StringBuilder();  
        try {  
            BufferedReader br =  
                new BufferedReader(new FileReader(file));  
            String line = br.readLine();  
            while (line != null) {  
                text.append(line);  
                line = br.readLine();  
            }  
            br.close();  
        } catch (IOException e) {  
            System.out.println("Error " + e.getMessage());  
        }  
        String data = text.toString();  
        String[] dataUser = data.split(";");  
  
        if (dataUser[1].equals(editPassword.getText().toString()))  
{  
            simpanFileLogin();  
            Intent intent = new Intent(this, MainActivity.class);  
            startActivity(intent);  
            finish();  
        } else {  
            Toast.makeText(this, "Password Tidak Sesuai",  
Toast.LENGTH_SHORT).show();  
        }  
        } else {  
            Toast.makeText(this, "User Tidak Ditemukan",  
Toast.LENGTH_SHORT).show();  
        }  
    }  
}
```

APLIKASI VALIDASI LOGIN - Membuat Halaman Register

1. Selanjutnya, tambahkan *Activity* baru, berikan nama *Activity* dengan **RegisterActivity**, serta nama layout **activity_register**.

New Android Activity

Configure Activity
Android Studio

Creates a new empty activity

Activity Name: RegisterActivity

☒ Generate Layout File

Layout Name: activity_register

☐ Launcher Activity

Package name: kominformasi.go.id.storage.proyek2

Source Language: Java

The name of the layout to create for the activity

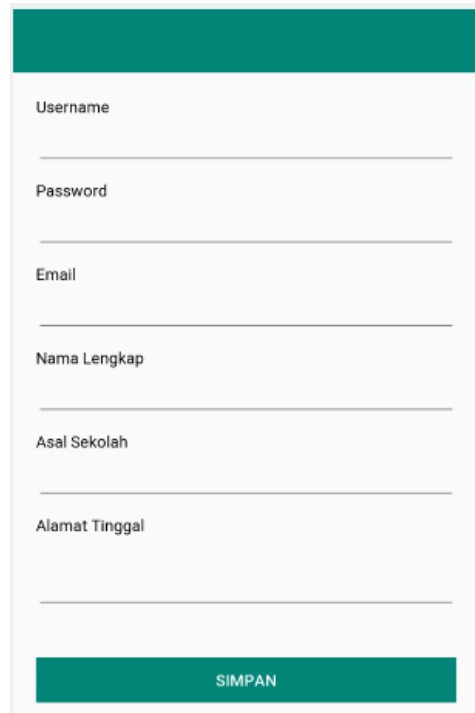

Activity Name must be unique

Previous Next Cancel Finish

Tambahkan RegisterActivity

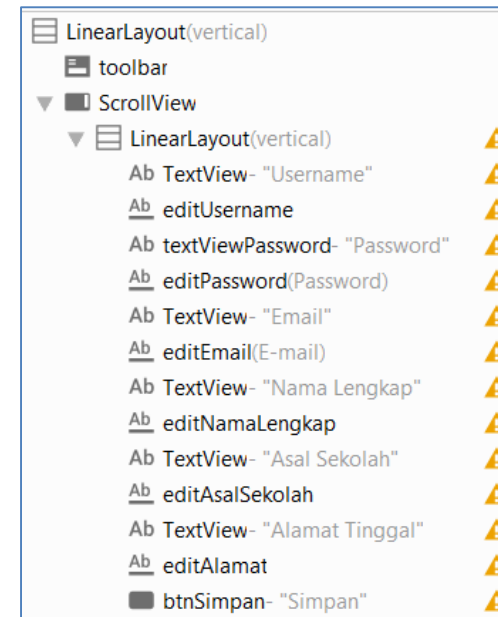

APLIKASI VALIDASI LOGIN - Membuat Halaman Register

2. Buatlah sebuah desain layout, dengan tampilan sebagaimana berikut :

Design tampilan RegisterActivity. The form has a green header bar. Below it, there are input fields for Username, Password, Email, Nama Lengkap, Asal Sekolah, and Alamat Tinggal. Each field has a corresponding label above it. At the bottom, there is a green button labeled SIMPAN.

Desain Tampilan RegisterActivity

. Struktur Layout RegisterActivity

APLIKASI VALIDASI LOGIN - Membuat Halaman Register

3. Sesuaikan kode `xml/activity_register.xml` sebagaimana berikut ini :

```
<?xml version="1.0" encoding="utf-8"?>
<LinearLayout
xmlns:android="http://schemas.android.com/apk/res/android"
xmlns:app="http://schemas.android.com/apk/res-auto"
xmlns:tools="http://schemas.android.com/tools"
android:layout_width="match_parent"
android:layout_height="match_parent"
android:orientation="vertical"
tools:context=".RegisterActivity">

    <android.support.v7.widget.Toolbar
        android:id="@+id/toolbar"
        android:layout_width="match_parent"
        android:layout_height="wrap_content"
        android:background="?attr/colorPrimary"
        android:minHeight="?attr/actionBarSize"
        android:theme="?attr/actionBarTheme" />

    <ScrollView
        android:layout_width="match_parent"
        android:layout_height="match_parent">

        <LinearLayout
            android:layout_width="match_parent"
            android:layout_height="match_parent"
            android:orientation="vertical"
            android:padding="20dp">

            <TextView
                android:layout_width="wrap_content"
                android:layout_height="wrap_content"
                android:text="Username"
                android:textColor="#000"
                android:textSize="14sp" />
```

APLIKASI VALIDASI LOGIN - Membuat Halaman Register

3. Sesuaikan kode `xml/activity_register.xml` sebagaimana berikut ini :

```
<EditText
    android:id="@+id/editUsername"
    android:layout_width="match_parent"
    android:layout_height="40dp"
    android:layout_marginTop="5dp"
    android:digits="abcdefghijklmnopqrstuvwxyz1234567890"
    android:inputType="textFilter"
    android:textColor="#000"
    android:textSize="14sp" />

<TextView
    android:id="@+id/textViewPassword"
    android:layout_width="wrap_content"
    android:layout_height="wrap_content"
    android:layout_marginTop="10dp"
    android:text="Password"
    android:textColor="#000"
    android:textSize="14sp" />

<EditText
    android:id="@+id/editPassword"
    android:layout_width="match_parent"
```

APLIKASI VALIDASI LOGIN - Membuat Halaman Register

3. Sesuaikan kode `xml/activity_register.xml` sebagaimana berikut ini :

```
        android:layout_height="40dp"
        android:layout_marginTop="5dp"
        android:inputType="textPassword"
        android:textColor="#000"
        android:textSize="14sp" />

    <TextView
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:layout_marginTop="10dp"
        android:text="Email"
        android:textColor="#000"
        android:textSize="14sp" />

    <EditText
        android:id="@+id/editEmail"
        android:layout_width="match_parent"
        android:layout_height="40dp"

            android:background="@color/colorPrimary"
            android:text="Simpan"
            android:textColor="#FFF"
            android:textSize="14sp" />
    </LinearLayout>
</ScrollView>

</LinearLayout>
```

APLIKASI VALIDASI LOGIN - Membuat Halaman Register

4. Pada kelas Java `RegisterActivity.java`, tambahkan kode berikut ini :

```
package kominfo.go.id.storage.proyek2;

import android.support.v7.app.AppCompatActivity;
import android.os.Bundle;
import android.support.v7.widget.Toolbar;
import android.view.View;
import android.widget.Button;
import android.widget.EditText;
import android.widget.Toast;

import java.io.File;
import java.io.FileOutputStream;

public class RegisterActivity extends AppCompatActivity {

    EditText editUsername, editPassword, editEmail, editNamaLengkap,
    editAsalSekolah, editAlamat;
    Button btnSimpan;

    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_register);

        Toolbar toolbar = findViewById(R.id.toolbar);
        setSupportActionBar(toolbar);

        getSupportActionBar().setDisplayHomeAsUpEnabled(true);
        getSupportActionBar().setDisplayShowHomeEnabled(true);

        getSupportActionBar().setTitle("Register");
    }
}
```

APLIKASI VALIDASI LOGIN - Membuat Halaman Register

4. Pada kelas Java `RegisterActivity.java`, tambahkan kode berikut ini :

```
editUsername = findViewById(R.id.editUsername);
editPassword = findViewById(R.id.editPassword);
editEmail = findViewById(R.id.editEmail);
editNamaLengkap = findViewById(R.id.editNamaLengkap);
editAsalSekolah = findViewById(R.id.editAsalSekolah);
editAlamat = findViewById(R.id.editAlamat);
btnSimpan = findViewById(R.id.btnSimpan);
btnSimpan.setOnClickListener(new View.OnClickListener() {
    @Override
    public void onClick(View v) {
        if (isValidation()) {
            simpanFileData();
        } else {
            Toast.makeText(RegisterActivity.this, "Mohon
Lengkapi Seluruh Data", Toast.LENGTH_SHORT).show();
        }
    }
});

boolean isValidation() {
    if (editUsername.getText().toString().equals("")) ||
```

APLIKASI VALIDASI LOGIN - Membuat Halaman Register

4. Pada kelas Java `RegisterActivity.java`, tambahkan kode berikut ini :

```
editPassword.getText().toString().equals("") ||
editEmail.getText().toString().equals("") ||
editNamaLengkap.getText().toString().equals("") ||
editAsalSekolah.getText().toString().equals("") ||
editAlamat.getText().toString().equals("")) {
    return false;
} else {
    return true;
}

void simpanFileData() {
    String isiFile = editUsername.getText().toString() + ";" +
editPassword.getText().toString() + ";" +
editEmail.getText().toString() + ";" +
editNamaLengkap.getText().toString() + ";" +
editAsalSekolah.getText().toString() + ";" +
editAlamat.getText().toString();
    File file = new File(getFilesDir(),
editUsername.getText().toString());

    FileOutputStream outputStream = null;
    try {
        file.createNewFile();
        outputStream = new FileOutputStream(file, false);
        outputStream.write(isiFile.getBytes());
        outputStream.flush();
        outputStream.close();
    } catch (Exception e) {
        e.printStackTrace();
    }
    Toast.makeText(this, "Register Berhasil",
Toast.LENGTH_SHORT).show();
    onBackPressed();
}
}
```

APLIKASI VALIDASI LOGIN - Membuat Halaman Register

5. Selanjutnya tambahkan kode java **MainActivity** sebagaimana berikut ini :

```
package kominfo.go.id.storage.proyek2;

import android.content.DialogInterface;
import android.content.Intent;
import android.support.v7.app.AlertDialog;
import android.support.v7.app.AppCompatActivity;
import android.os.Bundle;
import android.support.v7.widget.Toolbar;
import android.view.Menu;
import android.view.MenuItem;
import android.view.View;
import android.widget.Button;
import android.widget.EditText;
import android.widget.TextView;
import android.widget.Toast;

import java.io.BufferedReader;
import java.io.File;
import java.io.FileReader;
import java.io.IOException;

public class MainActivity extends AppCompatActivity {
    EditText editUsername, editPassword, editEmail, editNamaLengkap,
    editAsalSekolah, editAlamat;
    Button btnSimpan;
    TextView textViewPassword;

    public static final String FILENAME = "login";
```

APLIKASI VALIDASI LOGIN - Membuat Halaman Register

5. Selanjutnya tambahkan kode java **MainActivity** sebagaimana berikut ini :

```
@Override
protected void onCreate(Bundle savedInstanceState) {
    super.onCreate(savedInstanceState);
    setContentView(R.layout.activity_register);

    Toolbar toolbar = findViewById(R.id.toolbar);
    setSupportActionBar(toolbar);

    getSupportActionBar().setTitle("Halaman Depan");

    editUsername = findViewById(R.id.editUsername);
    textViewPassword = findViewById(R.id.textViewPassword);
    editPassword = findViewById(R.id.editPassword);
    editEmail = findViewById(R.id.editEmail);
    editNamaLengkap = findViewById(R.id.editNamaLengkap);
    editAsalSekolah = findViewById(R.id.editAsalSekolah);
    editAlamat = findViewById(R.id.editAlamat);
    btnSimpan = findViewById(R.id.btnSimpan);

    btnSimpan.setVisibility(View.GONE);
    editUsername.setEnabled(false);
    editPassword.setVisibility(View.GONE);
    textViewPassword.setVisibility(View.GONE);
    editEmail.setEnabled(false);
    editNamaLengkap.setEnabled(false);
    editAsalSekolah.setEnabled(false);
}
```

APLIKASI VALIDASI LOGIN - Membuat Halaman Register

5. Selanjutnya tambahkan kode java **MainActivity** sebagaimana berikut ini :

```
editAlamat.setEnabled(false);

bacaFileLogin();
}

void bacaFileLogin() {
    File sdcard = getFilesDir();
    File file = new File(sdcard, FILENAME);
    if (file.exists()) {
        StringBuilder text = new StringBuilder();
        try {
            BufferedReader br =
                new BufferedReader(new FileReader(file));
            String line = br.readLine();
            while (line != null) {
                text.append(line);
                line = br.readLine();
            }
            br.close();
        } catch (IOException e) {
            System.out.println("Error " + e.getMessage());
        }
        String data = text.toString();
        String[] dataUser = data.split(";");
        bacaDataUser(dataUser[0]);
    }
}
```

APLIKASI VALIDASI LOGIN - Membuat Halaman Register

5. Selanjutnya tambahkan kode java **MainActivity** sebagaimana berikut ini :

```
void bacaDataUser(String fileName) {  
    File sdcard = getFilesDir();  
    File file = new File(sdcard, fileName);  
    if (file.exists()) {  
        StringBuilder text = new StringBuilder();  
        try {  
            BufferedReader br =  
                new BufferedReader(new FileReader(file));  
            String line = br.readLine();  
            while (line != null) {  
                text.append(line);  
                line = br.readLine();  
            }  
            br.close();  
        } catch (IOException e) {  
            System.out.println("Error " + e.getMessage());  
        }  
        String data = text.toString();  
        String[] dataUser = data.split(";");  
  
        editUsername.setText(dataUser[0]);  
        editEmail.setText(dataUser[2]);  
        editNamaLengkap.setText(dataUser[3]);  
        editAsalSekolah.setText(dataUser[4]);  
        editAlamat.setText(dataUser[5]);  
  
    } else {  
        Toast.makeText(this, "User Tidak Ditemukan",
```

APLIKASI VALIDASI LOGIN - Membuat Halaman Register

5. Selanjutnya tambahkan kode java **MainActivity** sebagaimana berikut ini :

```
Toast.LENGTH_SHORT).show();  
    }  
}  
  
@Override  
public boolean onCreateOptionsMenu(Menu menu) {  
    getMenuInflater().inflate(R.menu.menu, menu);  
    return true;  
}  
  
@Override  
public boolean onOptionsItemSelected(MenuItem item) {  
    switch (item.getItemId()) {  
        case R.id.action_logout:  
            tampilkanDialogKonfirmasiLogout();  
            break;  
    }  
    return super.onOptionsItemSelected(item);  
}  
  
void hapusFile() {  
    File file = new File(getFilesDir(), FILENAME);  
    if (file.exists()) {  
        file.delete();  
    }  
}
```

APLIKASI VALIDASI LOGIN - Membuat Halaman Register

5. Selanjutnya tambahkan kode java **MainActivity** sebagaimana berikut ini :

```
void tampilkanDialogKonfirmasiLogout() {  
    new AlertDialog.Builder(this)  
        .setTitle("Logout")  
        .setMessage("Apakah Anda yakin ingin Logout?")  
        .setIcon(android.R.drawable.ic_dialog_alert)  
        .setPositiveButton(android.R.string.yes, new  
DialogInterface.OnClickListener() {  
  
            public void onClick(DialogInterface dialog, int  
whichButton) {  
                hapusFile();  
                Intent intent = new Intent(MainActivity.this,  
LoginActivity.class);  
                startActivity(intent);  
                finish();  
            }  
        })  
        .setNegativeButton(android.R.string.no, null).show();  
}
```

APLIKASI VALIDASI LOGIN - Menguji Aplikasi Proyek 2

1. Jalankan aplikasi, lalu
2. Uji fungsionalitas registrasi, login dan logout.

KESIMPULAN

- Proyek1, anda membuat aplikasi catatan harian dimana proses penyimpanannya menggunakan *external storage*.
- Proyek2, anda membuat aplikasi validasi login, dimana data user disimpan pada *internal storage*.
- Data persistence dapat digunakan untuk menyimpan data apapun sesuai kebutuhan dalam bentuk file. Data ini bersifat tetap dan tidak akan hilang selama tidak dihapus.
